KARL FRIEDRICH NGUEKO TCHINDEU

Engineering Apprentice – Continuous Improvement / Operational Excellence

Paris, France · karl.ngueko@2028.icam.fr · linkedin.com/in/karl-friedrich-ngueko-tchindeu-043b85272 · github.com/karlson148305
Portfolio: karl-ngueko-portfolio.lovable.app

PROFESSIONAL SUMMARY

Master's-level engineering student at Icam (France), specializing in Industrial Digital Systems, and Lean management apprentice at RATP Group, the Paris public transit operator, deploying 5S, TPM and Standard Work in a metro train maintenance workshop. Previous plant internships in India and Cameroon delivered a 15% cut in maintenance costs, an 8% productivity gain and 5% fewer machine stoppages. Bilingual French–English.

SKILLS

Lean & Operational Excellence: Kaizen, 5S, VSM, TPM, Kanban, SMED, PDCA, Standard Work, Visual Management, Gemba
Problem Solving & Quality: Root Cause Analysis (5 Whys, Ishikawa / Fishbone), 8D, A3, FMEA, Pareto Analysis
Maintenance & Operations: Preventive Maintenance, Bottleneck Analysis, Inventory Management, KPI Tracking
Project Management: Agile / Scrum, Gantt Charts, RACI, Work Breakdown Structure (WBS)
Software: Excel (data analysis, KPI dashboards), Power BI, Microsoft Project, Microsoft Office, SolidWorks
Industrial Digital Systems (coursework): Industrial IoT, data management, industrial cybersecurity, AI for decision support

WORK EXPERIENCE

Lean Management Engineering Apprentice (co-op program) Sep 2026 – Present
RATP Group (Paris public transit operator) – Operational Excellence, Rolling Stock Department | Paris, France

- Deploy Lean practices (5S, Total Productive Maintenance, Standard Work, visual management) in a metro train maintenance workshop.
- Facilitate shop-floor working groups with maintenance technicians and supervisors.

Lean Manufacturing Engineering Intern May 2025 – Aug 2025
Schwing Stetter India (concrete machinery manufacturer) | India

- Implemented preventive and corrective maintenance actions that reduced maintenance costs by 15%.
- Mapped production with Value Stream Mapping (VSM), exposing waiting time, excess motion and unbalanced workloads.
- Led Kaizen events with production and quality teams, using 5 Whys and Ishikawa root cause analysis.
- Deployed 5S and Standard Work on workstations; tracked KPIs in Excel and contributed to Power BI dashboards.

Industrial Production Assistant Intern Jan 2024 – Mar 2024
Nohi Chocolats (chocolate manufacturer) | Cameroon

- Increased productivity by 8% through structured improvement actions using the PDCA cycle.
- Reduced machine stoppages by 5% through root cause analysis of breakdowns (5 Whys, Ishikawa).
- Mapped production flows with VSM to locate bottlenecks, and redesigned workstations to improve ergonomics and flow.

PROJECTS

Kitting Feasibility Study (academic project, team of 2) 2026
Icam, Strasbourg Campus – Industry 5.0 and OptiProd modules | Strasbourg, France

- Assessed feeding two cart assembly lines (6 and 7 stations, 1.5 million carts per year) with complete kits and no parts at the line side: MTM-UAS time study, line balancing, buffer stock sizing and NPV; 34.5 s cycle time, 7.5-month payback.

Boat Rudder System Design (academic project) Sep 2024 – May 2025
Loyola-ICAM College of Engineering and Technology (LICET) | Chennai, India

- Conducted the functional and constraint analysis of a rudder system (reliability, safety, performance) in a team of 7.

EDUCATION

Master's-level Engineering Degree – Industrial Digital Systems Sep 2026 – May 2028 (expected)
Icam, Strasbourg Campus (Diplôme d'ingénieur, CTI-accredited, apprenticeship program) | Strasbourg, France

International Bachelor's Degree in General Engineering (4-year program) Sep 2022 – May 2026
Icam international network: Institut UCAC-Icam, Douala, Cameroon (3 years) and LICET, Chennai, India (1 year)

LANGUAGES & CERTIFICATIONS

Languages: French (native) · English (B2, professional working proficiency)
Certification: Applied Scrum for Agile Project Management
